

CI Receives Amgen Scholarship Gift

Camarillo, Calif., Jan. 21, 2010 - CSU Channel Islands (CI) is proud to announce a graduate scholarship gift for \$30,000 from Amgen for the MS in Biotechnology and Bioinformatics program and the MS in Biotechnology and MBA dual degree programs for the second year in a row.

This gift will be used to provide financial assistance to graduate students wishing to enter the biotechnology field. Students in these programs will, in turn, provide an educated workforce for the many biotech companies surrounding CI's campus.

CI students pursuing the two professional science master's programs have the opportunity to study scientific principles and knowledge underlying the rapidly advancing field of biotechnology and will learn basic lab techniques in research and development. They will be exposed to legal and intellectual property issues and learn the skills and knowledge important in business and bioentrepreneurship.

Working with faculty and experts from biotech companies like Amgen, Baxter, Ceres, Invitrogen, Alzheimer's Institute, Invenios, Integrity Biosolutions, Librede, Stellar Biotechnologies, Kythera Biopharmaceuticals, Symbion Research International, NeuroSystec, Celavie BioSciences, and other well known academic and health institutions, students are offered a wealth of internships and participation in relevant research projects. They also have the advantage of being able to learn from industry and research experts in their fields.

The programs' goals are that, through experiential, multidisciplinary learning, students will develop a wide range of skills in research, critical thinking, problem solving, communication, collaboration, and interpersonal skills that will enable them to reach their future career goals.

To date, these two PSM (professional science master's) programs are considered the best in the 23-campus CSU system, with the dual degree program being awarded an Outstanding Academic Program Award. These PSM programs have received substantial external funding and can boast that all of its graduates are currently either employed in the biotech industry, engaged in research, or are pursuing doctoral degrees.

For further information about the MS in Biotechnology and Bioinformatics program and the MS in Biotechnology and MBA dual degree programs, contact Dr. Ching-Hua Wang, Director of the MS in Biotechnology and Bioinformatics Program at CSU Channel Islands at 805-437-8870 or ching-hua.wang@csuci.edu.

For media inquiries contact Nancy Gill, Director of Communication & Marketing at CSU Channel Islands at 805-437-8456 or nancy.gill@csuci.edu.
