Suggestion, Idea!

EDC's Fact Sheet is perfect; recommend we use it as our Facts for the message in the AD. The following are Words or Message for the Ad —

THE TRUTH ABOUT LNG (Liquefied Natural Gas)

What Ventura County Community Leaders, Business and Elected Officials Say about bhp billiton's current LNG Proposal

1. (take from EDC's Fact Sheet) wording that includes 270 tons of pollution caused by delivery of three LNG Tankers (size of 2 or 3 football fields) per week. Oxnard School District PTA Council and Board of Trustees. Might like to name Debbie Morris and Board of Trustees.
2. An accident caused by human error, an Earthquake or other natural disaster would, according to CA Lands commission experts; would damage Ship lanes in Ventura County. This means risking damage to Navy and Port of Hueneme in coming and outgoing ships of cargo. Sport boats and fishing continually used for pleasure would also be endangered.
3. Homes and Property value in Oxnard would be harmed, especially homes and property where the pipelines are installed. Imagine more than 300 million cubic of natural gas - on a non-stop basis flowing underneath your home and or property and business. Highly inflammable gas igniting via the expected earthquake would not only destroy property but also kill inhabitants.
4. Other pipeline issues
5. Other issues (limit to 7 issues - should be brief and accurate).

Please add correct and make clear - to the point etc. The ad will be used to education people on the LNG issue (tell people the truth about the many dangers).
